

Conclusion

The Pennfield School District is committed to preparing all students to comprehend, contribute, and function within a technologically based society. We believe that through the use of technology our students can learn, communicate, and collaborate. We realize that technology is a learning tool that students should be allowed to take advantage of in their pursuit of the skills necessary to be contributing members of today's society. It is with this belief that we look for ways to provide all Pennfield students with the necessary educational technology resources. Technology will be used in Pennfield Schools to support the District Curriculum. This technology plan is an open document that will be reviewed, evaluated, and revised on a regular basis to ensure that our technology and district missions are achieved.
